Daniel Keinan

New York, NY • dk3425@columbia.edu • (917) 588-9429 • linkedin.com/in/daniel-keinan • github.com/dkdan10

Columbia CS senior (May 2027) with ~2 years of production full-stack experience at Medidata, now building and evaluating LLM systems. Seeking full-time software engineering roles beginning summer 2027.

EDUCATION

B.A. Computer Science | **Columbia University**, New York, NY *Expected May 2027*

- Coursework: Analysis of Algorithms, Data Structures, Artificial Intelligence, Natural Language Processing, Advanced Software Development, Software Quality & Design, Fundamentals of Computer Systems, Linear Algebra & Probability, Discrete Math

Software Engineering Bootcamp | **App Academy**, New York, NY *2019*

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Java, C, SQL, Ruby, Swift
Frameworks: React, FastAPI, Node.js/Express, Ruby on Rails, Django
Tools & Infra: Git, GitHub Actions (CI/CD), Docker, pytest/Hypothesis, Playwright, Vite, PostgreSQL, SQLite, MongoDB, Linux
ML / AI: LLM APIs (Anthropic, Ollama), LLM-agent evaluation, numpy/pandas

EXPERIENCE

Applications Engineer | **Medidata Solutions**, New York, NY *Dec. 2019 – Jun. 2021*

- Built patient-facing React components and Ruby on Rails endpoints for the "Ship Direct to Patient" feature, enabling remote medication delivery for clinical-trial participants during COVID-19 lockdowns.
- Shipped features into a large production Rails/React codebase supporting active clinical trials nationwide, through a two-approval pull-request workflow with senior engineers and dedicated QA.
- Worked on a 10-person Agile team (PM, senior and junior engineers, QA) to scope, implement, test, and release features.

Engineering Intern | **Kawada Robotics**, Tokyo, Japan *Feb. 2019 – May 2019*

- Programmed Kawada's NEXTAGE humanoid robot in C# using internal robotics software.

Software Engineering Intern | **AGMednet**, Boston, MA *Jun. 2018 – May 2019*

- Built a prototype configuration tool for AGMednet's medical imaging software using Angular and MongoDB.

PROJECTS

AiLibi — Multi-agent LLM social-deduction simulation & evaluation (live demo) | Python, FastAPI, React/TS, pytest, GitHub Actions

- Designed and directed a deterministic 9-agent Among Us–style simulation in which LLM agents reason only from sanitized observations; every accusation must cite evidence the agent saw, and a spectator UI links each vote to that evidence.
- Defined the evaluation program: pre-registered acceptance gates, byte-identical replay verification via per-tick state hashes (100/100 samples), and citation resolvability (526/527 ballots).
- Enforced an "observation firewall" with import-linter contracts and planted leak tests so agents cannot access hidden state; integrated 4 LLM providers behind a cost-budgeted client.
- Ran an evolution-strategies search over impostor policies; rejected 4 candidates that beat the baseline on win rate but failed the pre-registered evidence gate.

FADEAWAY — NBA shot-data pipeline & generative visualization (live) | Python (numpy/pandas), TypeScript, Canvas 2D, Playwright

- Built a resumable pipeline turning 5.9M shot attempts (30 seasons) and 3.79 GB of 25 Hz SportVU tracking data (632 games) into compact binary artifacts drawn by a zero-dependency Canvas renderer.
- Wrote a 224-check acceptance gate backed by a 120-case mutation catalogue (each injected defect must be caught by the check that owns it); verified 100% parity of the court-zone classifier across Python and TypeScript.
- Profiled and optimized rendering from a 94.7 ms worst frame to 5.2 ms (frames over the 16.67 ms budget: 119/540 → 0/540).

ADDITIONAL EXPERIENCE

House Manager | **Transcend Recovery Community**, New York, NY *May 2022 – Aug. 2024*

- Led daily operations for a structured residential community: crisis response, resident accountability, and cross-team communication in high-stakes situations.

Scout Player | **Columbia Women's Basketball**, New York, NY *Aug. 2024 – Present*

- Practice player simulating upcoming opponents for the varsity team; assist coaching staff with drills and player development.

Interests: Basketball (Division III), Chess, Music | **Volunteering:** Covenant House, Reading Partners
