# Daniel Keinan

New York, NY • dk3425@columbia.edu • (917) 588-9429 • linkedin.com/in/daniel-keinan • github.com/dkdan10

*Columbia CS student with 2+ years of professional full-stack engineering experience. Seeking full-time roles starting summer 2027.*

## EDUCATION

**B.A. Computer Science** | **Columbia University**, New York, NY *Expected May 2027*

- Coursework: Analysis of Algorithms, Data Structures, Artificial Intelligence, Natural Language Processing, Advanced Software Development, Software Quality & Design, Fundamentals of Computer Systems, Linear Algebra & Probability, Discrete Math

**Software Engineering Bootcamp** | **App Academy**, New York, NY *2019*

## TECHNICAL SKILLS

**Languages:** Python, TypeScript/JavaScript, Java, C, SQL, Ruby, Swift
**Frameworks:** React, FastAPI, Node.js/Express, Ruby on Rails, Django
**Tools & Infra:** Git, GitHub Actions (CI/CD), Docker, pytest/Hypothesis, Playwright, Vite, PostgreSQL, SQLite, MongoDB, Linux
**ML / AI:** LLM APIs (Anthropic, Ollama), LLM-agent evaluation, numpy/pandas

## EXPERIENCE

**Applications Engineer** | **Medidata Solutions**, New York, NY *Dec. 2019 – Jun. 2021*

- Built patient-facing React components and Ruby on Rails endpoints for the "Ship Direct to Patient" feature, enabling remote medication delivery for clinical-trial participants during COVID-19 lockdowns.
- Shipped features into a large production Rails/React codebase supporting active clinical trials nationwide, through a two-approval pull-request workflow with senior engineers and dedicated QA.
- Worked on a 10-person Agile team (PM, senior and junior engineers, QA) to scope, implement, test, and release features.

**Engineering Intern** | **Kawada Robotics**, Tokyo, Japan *Feb. 2019 – May 2019*

- Programmed Kawada's NEXTAGE humanoid robot in C# using internal robotics software.

**Software Engineering Intern** | **AGMednet**, Boston, MA *Jun. 2018 – May 2019*

- Built a prototype configuration tool for AGMednet's medical imaging software using Angular and MongoDB.

## PROJECTS

**AiLibi** — Among Us–style social deduction played by LLM agents (live demo) | Python, FastAPI, React, PixiJS

- Designed a deterministic game engine where every match is recorded and replays byte for byte. Players are rule-based during rounds; at meetings each one is fed its own memory of what it saw, and accusations, discussion, and voting are handled by LLMs.
- Put an observation firewall between the agents and the game: players never see the full state, and the boundary is enforced in CI with import contracts and leak tests.
- Moved the LLM backend across providers as budget and scale changed (Anthropic → local Ollama → Featherless for 50-game tournaments), all behind one cost-budgeted client.
- Built using a modern contract-driven workflow, with AI agents implementing written contracts with acceptance criteria — 110 in all — each shipped as its own PR and passed through AI review before I accepted it.

**FADEAWAY** — Art piece built on 30 seasons of public NBA shot data (live) | Python, pandas, TypeScript, Canvas

- Layers every shot from 1996 to 2026 onto one halfcourt to show how shot selection (midrange, threes, at the rim) and the record itself changed across eras; rendered in the browser with TypeScript and Canvas.
- Built the Python pipeline that turns 5.9M shot attempts and 632 games of player tracking into compact binary files for the renderer.
- Added an acceptance gate that re-checks every number on screen against its source before anything ships.
- Wrote a companion paper, CONTESTED, on how NBA data is defined, gathered, and owned.

## ADDITIONAL EXPERIENCE

**House Manager** | **Transcend Recovery Community**, New York, NY *May 2022 – Aug. 2024*

- Led daily operations for a structured residential community: crisis response, resident accountability, and cross-team communication in high-stakes situations.

**Scout Player** | **Columbia Women's Basketball**, New York, NY *Aug. 2024 – Present*

- Practice player simulating upcoming opponents for the varsity team; assist coaching staff with drills and player development.

**Interests:** Basketball (Division III), Chess, Music | **Volunteering:** Covenant House, Reading Partners
